Ugandan Dairy Farmers' Learning Tour – Canada 2026

The **2026 Ugandan Dairy Farmers' Learning Tour** is the second exchange program organized by Sekama, following the successful 2025 event in Oxford County, Ontario. The initiative strengthens partnerships between Canada and the Global South through **technology exchange, knowledge sharing, and capacity building** in the dairy sector.

During the tour, Ugandan participants, including farm owners, managers, and cooperative leaders, will:

- Visit leading Canadian dairy farms and research institutions
- Learn about livestock genetics, feeding systems, and sustainable farm management
- Explore value-added dairy processing and agri-tech innovations
- Attend **Canada's Outdoor Farm Show** in Woodstock, Ontario

Participants are selected through a **competitive process** based on leadership, openness to innovation, and their potential to share knowledge within their communities. Delegates cover their travel and accommodation costs, while Sekama coordinates local logistics and professional visits in collaboration with Canadian partners.

As part of this ongoing exchange, **Canadian farmers will travel to Uganda in early 2026** to deliver on-farm training and share hands-on expertise with their Ugandan counterparts.
